EDUCATION & TRAINING

Vector-Borne Illness Fundamentals:

Provides an in-depth examination of the basic science, clinical experience, and trial evidence pertaining to the diagnosis and treatment of patients infected with Lyme and other tick-borne diseases.

ILADEF Physician Training Program:

This one-on-one mentorship is designed to provide qualified medical professionals with the tools to diagnose and treat chronic Lyme and other tick-borne disease patients.

ILADS Scientific & European Conferences:

These in-person educational events offer members around the world the chance to learn new techniques, build their professional network, discuss difficult patients, and hear about new products & services from vendors in the field.
